SOUL COUTURE APPLICATION

Software Features, Pricing & Subscription Agreement

1. Executive Summary

Soul Couture Application is a premium tailoring and design-specification management platform developed to streamline customer management, measurement recording, garment design planning, reference collection, and customer communication workflows.

The application provides a complete digital solution for boutique operations by replacing manual registers, paper measurement books, and scattered design references with a centralized cloud-based system.

The application is developed using Flutter for cross-platform compatibility and Supabase for secure cloud data management.

2. Application Overview

The Soul Couture Application enables tailoring businesses to:

- Manage customer profiles and orders.
- Record and maintain body measurements digitally.
- Create professional garment specification sheets.
- Store design inspirations and reference materials.
- Communicate with customers through integrated workflows.
- Access data securely from mobile and tablet devices.

3. Core Features & Client Management Dashboard

The Dashboard serves as the central management interface for daily boutique operations.

3.1 Unified Client Management

The system maintains a centralized customer database containing:

- Customer Name
- Contact Number
- Profile Photo
- Order Type
- Delivery Date
- Order Status

3.2 Dashboard Metrics

Real-time summary cards display:

- Active Orders
- Orders Due Today
- Overdue Orders

Users can tap any metric to instantly filter corresponding records.

3.3 Advanced Filtering

Orders can be filtered by:

- Order Status
 - Ordered
 - Completed
 - Delivered
- Order Type
 - Stitching
 - Hand Embroidery
 - Combined Orders
- Delivery Timeline
 - Today
 - This Week

- Pending
- Custom Date Range

3.4 Search & Sorting

The application provides:

- Customer Name Search
- Phone Number Search
- Alphabetical Sorting
- Registration Date Sorting
- Priority-Based Sorting

3.5 Dynamic Grid View

Users can adjust dashboard display density through pinch-to-zoom functionality, allowing between 2 and 5 columns.

3.6 Customer Registration

New customers can be registered with:

- Name
- Phone Number
- Delivery Date
- Order Type
- Profile Photo Upload

4. Interactive Vector Measurement Studio

The application replaces traditional measurement books with a digital measurement recording system.

4.1 Visual Measurement Interface

A custom mannequin illustration visually represents measurement areas.

Supported measurements include:

- Shoulder
- Chest
- Waist
- Sleeve

Supported measurements include:

- Thigh
- Inseam
- Length

Users can tap body regions directly on the mannequin to enter measurements.

Selected measurement fields highlight the corresponding guide line for improved accuracy.

4.2 Measurement Validation

The system supports:

- Numeric-only inputs
- Decimal values
- Inch-based measurements

4.3 Measurement Summary

Measurements are organized into structured Upper Body and Lower Body sections.

5. Digital Design Workspace & Spec Sheet Studio

The application includes a dedicated design and annotation workspace.

5.1 Reference Mannequins

Available templates include:

- Male
- Female
- Boy
- Girl

5.2 Drawing Workspace

Supported canvas types:

- Blank
- Grid
- Dotted
- Lined

5.3 Dynamic Canvas Expansion

The drawing area automatically expands when required.

5.4 Design Tools

Available tools include:

- Pen Tool
- Color Selection
- Thickness Adjustment
- Highlighter
- Undo
- Redo
- Clear Canvas

5.5 Design Annotations

Designers can place movable text notes such as:

- Neckline Instructions
- Fabric Notes
- Stitching Instructions
- Embroidery Details

5.6 Professional Spec Sheets

The system automatically generates branded specification sheets containing:

- Studio Branding
- Customer Information
- Design Sketches

- Notes
- Creation Timestamp

5.7 PDF Export

Users can export designs as professional A4 PDF documents for printing and sharing.

6. Reference Media & Web Link Management

The application allows storing customer-specific design references.

Features Include:

- Photo Upload
- Camera Capture
- Gallery Import
- Instagram Link Storage
- Website Link Storage
- Full-Screen Media Preview
- External Browser Launch

This ensures all customer inspiration materials remain organized within a single profile.

7. Communication & Sharing Workflows

7.1 Measurement Sharing

The application generates structured measurement summaries for easy sharing.

Included information:

- Customer Details
- Order Status
- Delivery Date
- Complete Measurements

7.2 WhatsApp Integration

The application supports:

- Direct Customer Chat Launch
- One-Tap Messaging

7.3 Delivery Notifications

Upon order completion, the system can generate a ready-to-send notification message informing customers that their order is available for pickup.

8. Cloud Infrastructure & Security

The application is powered by Supabase cloud infrastructure.

Database Modules

- Customers
- Measurements
- Design Sheets
- Reference Media

Storage Services

- Customer Photos
- Design Files
- Reference Images

Authentication

- Secure Email Login
- User Verification

Security

- Row Level Security (RLS)
- Protected Cloud Storage
- Secure Database Access Controls

9. Deliverables

The project deliverables include:

- Fully Functional Mobile Application
- Tablet Optimized Interface
- Cloud Database Setup
- Authentication System
- PDF Export Functionality
- WhatsApp Integration
- Source Code Deployment
- Production Configuration

10. Commercial Terms

One-Time Development Fee

₹25,000 (Twenty-Five Thousand Rupees Only)

Includes:

- Application Development
 - Database Setup
 - Initial Deployment
 - User Configuration
 - Training & Handover

Monthly Subscription Fee

₹2,000 per Month

Includes:

- Cloud Hosting
- Database Maintenance
- Technical Support
- Bug Fixes

- Security Updates
- Performance Monitoring

11. Payment Terms

- One-Time Development Fee of ₹25,000 payable before final deployment.
- Monthly Subscription Fee of ₹2,000 payable in advance every month.
- Failure to maintain subscription payments may result in suspension of cloud services and support.

12. Change Requests

Any new features, enhancements, integrations, or custom development requests outside the scope of this document shall be quoted and billed separately.

13. Acceptance

By signing below, the client acknowledges acceptance of the software features, pricing, and subscription terms outlined in this document.
